

ULTRA POMPE S.r.l.

PUMPS FOR LUBRICATION, METERING AND THRUST

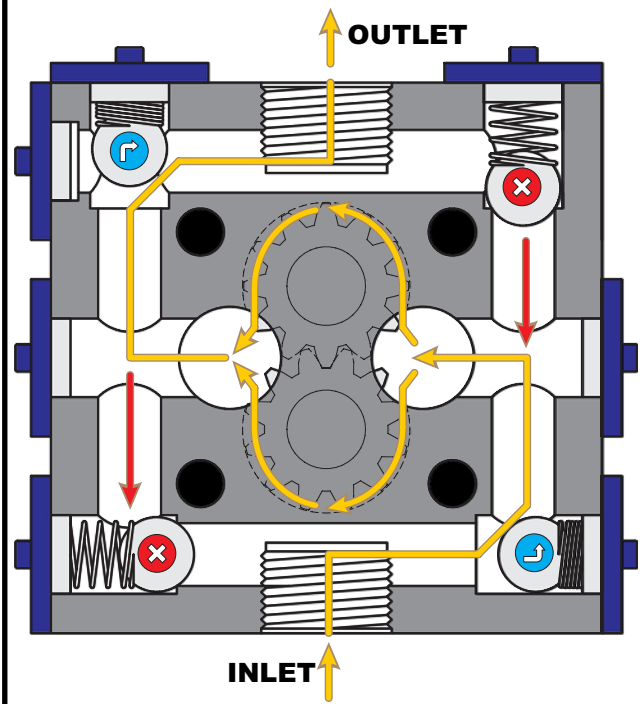

GL-28-V-U

“UNIDIRECTIONAL BLOCK”

G-series gear pumps can mount an Unidirectional block. In this case the pump is supplied with an internal unidirectional valve system: the drive shaft rotation can change from clock wise to counterclockwise without any change for pumping sense.

**CLOCK WISE
ROTATION**

**COUNTER CLOCK WISE
ROTATION**
